SUMMARY

Software Developer with hands-on experience in the MERN stack (MongoDB, Express.js, React, Node.js), PostgreSQL, and NestJS, specializing in secure API development, scalable backend architecture, and modern front-end interfaces using React and Next.js. Skilled in JavaScript/TypeScript, database design, RESTful services, third-party integrations, and performance optimization. Proven track record of improving system reliability, automating workflows, and delivering clean, maintainable, and production-ready code across diverse client and product environments.

SKILLS

Frontend: JavaScript, TypeScript, React, Next.js, HTML, CSS, Material UI, Tailwind CSS

Backend: Node.js, NestJS, Express.js, RESTful API Development, JWT Authentication

Databases & Tools: PostgreSQL, MySQL, Prisma ORM, TypeORM, GitHub, Docker, Vercel, N8N, CI/CD Pipelines, Agile

EXPERIENCE

Associate Software Engineer (MERN Stack)

OptimaGeeks

July 2025 - December 2025 Lahore

- Built a Chrome extension incorporating Zoho CRM + Supabase, reducing manual data entry by 40% and speeding up client workflow automation.
- Developed backend services in Express.js with secure APIs, improving feature integration time by 30%.
- Engineered a NestJS + MySQL + TypeORM backend with JWT authentication, boosting system reliability by 25%.
- Integrated Express.js with React/Next.js apps to deliver RESTful API connectivity, enabling a 40% increase in feature delivery across 12 client projects.
- Optimized complete MERN workflows in 2 major projects, cutting API response time by 45% and improving CRUD performance.

Associate Software Engineer

ThreeUpTech

November 2024 - July 2025 Islamabad

- Enhanced an automated marketing dashboard that reduced reporting overhead by 40% by aggregating data from Google Ads, Facebook, Bing, LSA, and FUB.
- Improved SEO and content automation by 35% by enhancing a custom website builder with dynamic metadata, advanced search, and auto-generated blog APIs.
- Embedded the Follow Up Boss API into FUBHandler, decreasing manual lead management by 60% via real-time syncing and automated cleanup.
- Boosted operational workflows by 50% by orchestrating n8n automations that connected internal tools and eliminated repetitive manual tasks.

Frontend Developer

Freelancing

July 2023 - September 2024

- Delivered custom full-stack solutions to global clients with a 95% on-time delivery rate.
- Implemented CI/CD pipelines using Git + Vercel, reducing deployment errors by 30% and cutting release cycles from days to hours.
- Built responsive front-end applications in React, Next.js, and Tailwind CSS, improving UI performance and engagement.

PROJECT

Hacktoberfest

DigitalOcean/GitHub

- Submitted 8+ pull requests, fixing bugs and improving documentation across multiple open-source repositories, with 100% PR approval from maintainers.
- Collaborated with 3+ project maintainers through issues and code reviews, ensuring contributions met repository coding standards and improved project stability.
- Enhanced Git workflow efficiency by resolving 2+ merge conflicts, managing branches, and completing all required contributions.

Staysco

OptimaGeeks

- Build a property booking platform with secure passwordless login, reset password, and JWT auth, boosting user onboarding by 25%.
- Incorporated Stripe payments and APIs with TenStack Query, optimizing booking transactions and data updates, reducing response time by 30%.
- Engineered a scalable backend with NestJS + MySQL + TypeORM and a responsive frontend, supporting 500 concurrent users without downtime.

EDUCATION

B.Sc. in Computer Engineering

UET Taxila • 2024
